

8 questions before you trust an app with the family record

Look past the word 'private'. Write down what the app actually says, and leave a blank where the answer is unclear.

☐

1

ACCOUNT**Can I inspect or begin without creating an account?**☐

2

STORAGE**What stays on the device, and what goes to cloud storage?**☐

3

SHARING**Who can see a shared record, and how is access removed?**☐

4

AI**What does any AI feature receive, and is consent required first?**☐

5

ANALYTICS**Are analytics or advertising tools kept separate from baby data?**☐

6

LOCATION**Is location required, optional or stored?**☐

7

EXPORT**Can the family take its history out in a usable format?**☐

8

DELETION**Can the account and cloud copy be deleted clearly?**

A useful answer is specific

Sync and sharing can require data to move. The practical test is whether the app explains each transfer, limits it to the job requested, and gives the family a meaningful choice. This checklist is not a security audit or legal advice.
